Education

Rochester Institute of Technology

BS in Human-Centered Computing

Personal Projects

Permission Granted

Java for Android

An e-sign app for videographers, vloggers, and anyone who regularly uses release forms. Users are able to quickly and easily create, view, and sign release forms directly on their phone.

Warmer Colder

Java for Android

Based on the childhood game of Hunt the Thimble, where one player tries to guess a location that another player chooses. Uses the Android Location API to determine proximity to a location.

Tip Calculator for WearOS

Java for Android

An application solely for Wear OS devices. It calculates a tip and total based on a base price and a tip percentage.

Math Based N-Back Test

C# Universal Windows App

An application that tests working memory by showing participants a series of single-digit math questions, then having them give the answer to the previous question. Published on the Windows Store.
